

Marianists Take Vows In Gardena

Six Marianists Brothers of the Pacific Province of the Society of Mary will profess their perpetual vows and make their public profession today at Maria Regina Catholic Church in Gardena.

Those making their vows are Bros. Vincent P. Branick, Raymond E. Malley, Joseph A. Rausser, John W. Wisecaver, Robert B. Head and Rudolph J. Zimbra.

They will take the three vows of poverty, chastity and obedience, common to all Catholic religious congregations, and stability, a vow to remain for the rest of their lives with the Society of Mary in its works of educating young men.

The Society of Mary (Marianists) is a Roman Catholic Congregation of priests, working brothers and teaching brothers. They wear ordinary black business suits instead of the customary religious garb of other orders. This society is noted for the equal status of both priests and lay members.

The Province of the Pacific of Marianists staff high schools and colleges in Southern California, the San Francisco Bay Area, Hawaii, Japan, Korea and Australia.

STL Holds Dedication For Center

A million dollar center to produce microscopically small electronic circuits for manned and unmanned spacecraft was dedicated in Lawndale Wednesday by TRW Space Technology Laboratories.

TRW's 15,000 square-foot, company-funded Microelectronics Center will turn out special high performance and ultra-reliable electronics components for systems and sub-systems projects such as the Lunar Excursion Module (LEM) of NASA's Apollo spacecraft and many of the other spacecraft and space communications projects now in progress, all at TRW Space Technology Laboratories.

"We have built the Microelectronics Center so that we may be better equipped to meet the increasingly stringent technical requirements of our customers in the Department of Defense and the National Aeronautics and Space Administration," said Dr. Ruben F. Mettler, president of TRW Space Technology Laboratories.

DOROTHY DIGGS
in the garden

The tedious job of weeding the lawn and garden need no longer be a major problem, but care must be taken to learn to use the right substance to destroy the weeds or seeds in the right season.

Many weed killers are designed to kill the seed in pre-emergence stages. Others to kill through foliage and still others to kill through roots.

During the past summer many weed seeds have implanted themselves in the ground. Even though you have taken care to destroy the weed those loose seeds will live to grow a new crop.

Ask your nurseryman to recommend a good pre-emergence killer for your particular use, making sure that you describe the area in which it is to be used. Keep in mind that other grass seeds and tree roots are apt to be affected by the use of some substances.

In the spring if you see that some of the weeds have survived then turn to a selective weed killer before seeds begin to drop into the area again.

The substance 2-4-D with 2-4-D-5-T is very effective in taking out some of the unwanted weeds and grasses.

Be sure that you have read the directions on the labels of any weed killer before you use it.
